## RRH CARDIOVASCULAR DISEASE PROGRAM

### Ghassan A. Mohsen, M.D., FACC, FACP

Dr. Mohsen has joined the Ridgecrest Regional Hospital group of physicians to provide **full-time heart and vascular care** to the people of our community. He joins Dr. Earl Ferguson, and together, they are ready to assist adults and teenagers improve their health and decrease the risks of cardiovascular disease.

Dr. Mohsen is board certified in Cardiovascular Disease and Internal Medicine, graduated from Saint Louis University Medical School and completed post-graduate training at Saint Louis University and Tulane Hospitals and Clinics.

Along with members of our cardiovascular team, Dr. Mohsen aims to set the highest standard for quality care by providing technologically advanced clinical care in the context of personal and timely care for each patient.

## CARDIOVASCULAR OUTPATIENT SERVICES

The Outpatient Center for Cardiovascular Care, located in the Rural Health building, provides **comprehensive cardiovascular care for patients 13 years of age and older**. We offer preventative care and management as well as treatment of cardiac issues.

Our clinic prides itself in making full support available to you, by listening to you with the goal of not only identifying your concerns, but also screening you for possibly unrecognized cardiovascular disease.

Coronary artery disease is often not diagnosed until a person has a heart attack, and **one of our main goals is early detection to prevent this from happening to you**. We can address a variety of common conditions that could be due to cardiovascular disease including:

- ♥ Palpitations
- ♥ Shortness of breath
- ♥ Leg pain and cramps
- ♥ Leg swelling
- ♥ Fatigue
- ♥ Chest Pain

**Should you need advanced intervention care, our team will make sure you are seen promptly by the appropriate specialists.**
