

OUR PROVIDERS

Larry Cosner, MD

As Medical Director for the Ridgecrest Regional Hospital Occupational Medicine Clinic, I look forward to working with a stellar group of providers and staff. Together, this team will be able to provide the

Indian Wells Valley with superb, 21st Century care for all the Industrial and Occupational Medicine needs.

Susan Hammon, NP

As the primary provider and coordinator of Ridgecrest Regional Hospital's Occupational Medicine Clinic I am ready to meet the needs of Ridgecrest, Trona, Inyokern and the surrounding

communities' occupational and industrial needs. Our services will include pre-employment physical examinations, fitness for duty, and annual surveillance exams, as well as DOT physicals and follow up of on the job injuries. We will also be available for sports physicals required by our local schools and college.

Christian Schwartz, PA-C

I'm pleased to be a part of this new service that RRH is providing to the community. With recent FMCSA certification we can provide DOT physicals along with a broad spectrum of

employee health care. I look forward to working alongside Dr. Cosner and Mrs. Hammon NP.

RIDGECREST REGIONAL HOSPITAL OCCUPATIONAL MEDICINE CLINIC

Occupational Medicine Clinic at RRH provides a central location for all occupational medicine services. Our goal is to help employers keep their workers well and safe.

WHY SHOULD YOU AND YOUR EMPLOYEES OBTAIN CARE FROM AN OCCUPATIONAL MEDICINE CLINIC?

Getting injured at work is a serious issue and you need to ensure that your employees get proper care and treatment. We understand that care and treatment for work related illnesses and injuries not only need to meet an organization's policies, but everything from a patient's injury or illness to treatment plan and follow up details have to be documented and recorded accurately. While our clinical staff focuses on providing optimal care to your employees, we have a team in place that specialize in working with those who are filing worker's compensation claims or who have work-related medical needs.

Any time you need to see a doctor due to work-related issues, seek out an occupational medicine clinic.

WHAT SERVICES DO WE OFFER?

- Drug and alcohol screening for new or continued employment
- Blood borne pathogen screening
- Post-accident screening and testing
