

Understanding your choices

If you need help, this brief guide will assist you in your search to find personal assistance in Ridgecrest for yourself, a friend, or a family member.

A Licensed Clinical Social Worker (LCSW)

has completed a master's degree in social work as well as extensive post-graduate clinical training. She/he can evaluate, diagnose, and treat nervous, emotional, and mental disorders as well as problems of everyday life. Social workers may provide psychotherapy for individuals, couples, families, and groups, rehabilitation and case management services in hospitals, clinics, and in private practice.

A Licensed Marriage and Family Therapist (LMFT)

has completed a master's degree in counseling, as well as extensive post-graduate clinical training. LMFT's may provide psychotherapy and work in a variety of settings with individuals, couples, families, children, and groups to improve the client's interpersonal functions.

A Psychiatrist is a medical doctor (M.D.)

with special education and training in psychiatry. She/he can diagnose and treat the biological causes of mental disorders and prescribe medications and other therapies.

A Licensed Clinical Psychologist must complete a Ph.D. or Psy.D. in clinical psychology as well as extensive post graduate clinical training. She/he can evaluate, diagnose, and treat nervous, emotional, and mental disorders as well as everyday problems of life. Most psychologists have specialized expertise in testing, psychological evaluation and psychotherapy.
